

IDF PRESS RELEASE

Brussels, 1st June 2017

THE INTERNATIONAL DAIRY FEDERATION SUPPORTS THE WORLD MILK DAY

The International Dairy Federation (IDF) helps nourishing the world with safe and sustainable milk, and on the occasion of the World Milk Day, highlights the benefits of milk.

Using the best available scientific and evidence-based information, IDF enables the dairy sector to reach global consensus on scientific and technical issues relating to all aspects of the dairy chain from farm to fridge. The dairy sector proactively promotes the nutritional benefits of milk to ensure it remains an integral, sustainable and safe part of dietary patterns at every age.

IDF has collected a variety of initiatives across the globe to gain valuable insights into how the World Milk Day is celebrated and to share and learn from other countries.

“IDF works tirelessly to give the global dairy sector a strong and united voice. Through the coordinated efforts of all the IDF member countries, the World Milk Day provides an excellent opportunity for us all to recognize and celebrate our achievements. We look forward to addressing the challenges ahead.” explained Dr Nico van Belzen, Director General of IDF.

International Dairy Federation

The International Dairy Federation is the leading source of scientific and technical expertise for all stakeholders of the dairy chain since 1903. IDF engages all stakeholders in productive activities and research projects to further current

knowledge and science on a wide range of issues. Today, dairy is one of the most vibrant and strategic sectors, with a major impact on national economies, public health and the environment. Through its working bodies, events and work programme, IDF provides a common platform, systems and processes for the global dairy sector to come together to reach consensus. Given its consensus-building capacity, IDF represents the global voice of dairy towards stakeholders and intergovernmental organisations. For more information, please visit www.fil-idf.org.
